chinese

Intermediate

ANH NGUYEN NGOC

Frontend Developer

Although I stopped pursuing my education path due to my personal reason, I still have an effort to complete my dream by studying by myself. With my current knowledge about frontend side, I have learn more modern technology such as reactJS, javascript,... I have conduct some project such as movie management and get more compliment from my direct manager. I will do the best to become an fullstack engineer in the future.

Experience

Ho Chi Minh
Nov 2020 - Oct 2022

Front End Developer
Cybersoft Company

- Join and discuss with team to find suitable solution
- Define and integrate with the front-end side.
- Identify the various components to re-create the design in HTML and CSS, for both Mobile and Desktop.
- Turn the static pages into a micro app: make the app interactive with animations, get users' inputs and send to server, collaborate on APIs that communicate between front-end and back-end
- Design UX reflect all the interactions between the app and users
- Modify and maintain legacy front-end functionalities.
- Collaborate with a team to define, design, and ship new features.
- Join Scrum ceremonies (standup, grooming, retrospective, review and planning).
- Research on front-end trending, best practices, good technologies to suggest and apply to the site, in order to enhance user experience.

Education

Ho Chi Minh
2021 - 2022

Certificate
Cybersoft school

Learn and practice HTML, CSS, SASS, ReactJS
